

# Certificate of Analysis

**Human Adipose-derived Stem Cell Growth Medium**

Catalog No.HUXMD-90011

Lot Number: T130626G001

Preparation Date: 2013-06-26

Size: 500ml

---

## Kit Components

Containing 440 ml of Human Adipose-derived Stem Cell Basal Medium (Cat. No. HUXMD-03011-440), 50 ml of Adipose-derived Stem Cell-Qualified Fetal Bovine Serum (Cat. No. HUXMD-05001-50), 5 ml of L-Glutamine, 5 ml of Penicilin-Streptomycin Solution, pH 7.2. Store at 4°C.

## Sterility

Bacterial and Fungal Contamination: Samples are inoculated and cultured in blood agar plate, thioglycolate broth, tryptocase soy broth and sabouraud dextrose agar.

Specification: No growth must be observed.

Mycoplasma: Samples are tested for mycoplasma contamination using a PCR-based assay and direct culture.

Specification: Results must be negative.

Endotoxin: Samples are tested for endotoxin contamination with LAL test.

Specification: Results must show a concentration of  $\leq 25\text{EU/ml}$ .

## Cell culture testing

Each batch of growth medium is tested for its ability to support in vitro growth of human adipose-derived stem cells. When are cultured in growth medium, cells must demonstrate a doubling time of 18~24 h, can proliferate for  $\geq 5$  passages, and that  $\leq 5\%$  of cells exhibit spontaneous differentiation in each passage.

## Results:

All specifications have been met.
